MORAVIAN POTTERY & TILE WORKS
HOUSE AT HAVERFORD, PA., FOR ROBERT C. CLOTHIER, ESQ.
TILDEN & REGISTER, ARCHITECTS

FOREWORD

THE Exhibition Board takes this opportunity to convey to the President and Directors of the Art Club its very hearty thanks for the use of their galleries, and also to thank the Architects and other Artists who have contributed their works for exhibition.

In continuing the series of examples of Old Colonial Architecture the Board has this year chosen for illustration certain old Farm Houses and Barns. For these interesting photographs, and for those in preceding Year-Books the Board wishes to extend its thanks to Mr. Ph. B. Wallace. It is hoped that these pages will prove of permanent value.

To Mr. Edwin H. Fetterolf, the Board is indebted for the Cover and Title Page of the Year Book.

The attention of Architects, and all others interested in this publication, is directed to the advertising pages, in which will be found much valuable information for constant reference.

THE WALTER COPE MEMORIAL PRIZE

Endowed by Mrs. Walter Cope, in memory of her husband, who was one of the founders of the T Square Club, and awarded annually by the T Square Club to the winner of a competition for projects on Municipal Improvement or Landscape Architecture. It is now of a value of about one hundred and fifty dollars, and is expended for Architectural Books or Architectural Education chosen in consultation with the Executive Committee of the T Square Club.

The prize winners and the subjects for competition have been as follows:

1904—A Monumental Entrance to Fairmount Park, Philadelphia. Henry B. Ward.
1905—A Recreation Park and Pier on the Delaware River Front. Andrew J. Sauer.
1906—A Subway Kiosk. C. Edgar Cope.
1907—A Covered Bridge Across Market Street, Philadelphia. Francis Palmer Smith.
1908—A Monument at the Entrance of the Harbor, Philadelphia. Grant M. Simon.
1909—Two Types of Electric Light Standards for Street Lighting. Henry Edwin Rieger.
1910—Treatment of a Public Square on the Parkway. Wm. Richard M. Keast.
1911—The Treatment of a City Block of Two-story Dwellings. A. Raymond Holland.
1912—A memorial to John Ericsson on the Parkway.
1st Prize—Gabriel B. Rothkugel. 2d Prize—Peter F. Getz.
1913—Design for a New Case for Liberty Bell, Independence Hall. John F. Harbeson.
1914—A Monumental Feature at the End of South Broad Street.
1st Prize—Thomas Ash. 2d Prize—S. A. Love, Jr.
1915—Treatment of an Open Place at the Head of the Bridge over the Schuylkill River at Packer Avenue, South Philadelphia.
1st Prize—W. P. Barney. 2d Prize—F. W. Hastings.
1916—A Group of Workingmen's Houses. Charles E. Keyser, Jr.

THE JOHN STEWARDSON MEMORIAL SCHOLARSHIP IN ARCHITECTURE

FOUNDED 1897

(PRIOR TO 1897 THE TRAVELING SCHOLARSHIP OF THE UNIVERSITY OF PENNSYLVANIA)

Endowed in memory of the late John Stewardson and awarded every year or alternate year by a Managing Committee, consisting of one member of the Board of Trustees of the University of Pennsylvania, one member of the Corps of Instruction of the School of Architecture of the said University, and three practicing Architects of the City of Philadelphia, two representing respectively the Philadelphia Chapter of the American Institute of Architects and the T Square Club of Philadelphia, and the third being elected by the four other Members of the Managing Committee. It is of a value of one thousand dollars, the sum being expended in pursuing Architectural study either in the United States or in other countries. Preliminary examinations are required except for graduates of any recognized School of Architecture. Open to any person or persons under thirty years of age, who shall have studied or practiced Architecture in the State of Pennsylvania for the period of at least one year immediately preceding the examination.

AWARDS

UNIVERSITY SCHOLARSHIP

1893—A Building for a Numismatic Society. JAMES P. JAMIESON.
1894—A Railroad Station. GEORGE BISPHAM PAGE.

PHILADELPHIA CHAPTER
OF THE
AMERICAN INSTITUTE OF ARCHITECTS

OFFICERS 1916-1917

HORACE WELLS SELLERS, President
1301 Stephen Girard Building, Philadelphia

JOHN P. B. SINKLER, *First Vice-President*
806 Bailey Building, Philadelphia

EMLYN L. STEWARDSON, *Second Vice-President*
316 Walnut Street, Philadelphia

EDWARD A. CRANE, *Secretary*
1012 Walnut Street, Philadelphia

ARTHUR I. MEIGS, *Recorder*
205 South Juniper Street, Philadelphia

EDMUND C. EVANS, *Treasurer*
Witherspoon Building, Philadelphia

Executive Committee

E. B. GILCHRIST
EDWARD A. CRANE
EDMUND C. EVANS
ARTHUR I. MEIGS
HORACE WELLS SELLERS
JOHN P. B. SINKLER
EMLYN L. STEWARDSON
H. B. REGISTER
FRANK R. WATSON

STANDING COMMITTEES FOR 1917

Committee on Admissions—

ELLISTON P. BISSELL (*Chairman*)
JOHN FREDERICK HARBESON
THOMAS M. KELLOGG
CHARLES Z. KLAUDER
WALTER H. THOMAS

Committee on Municipal Improvement—

JOHN HALL RANKIN (*Chairman*)
MILTON B. MEDARY, JR.
ARTHUR I. MEIGS
JOHN T. WINDRIM
EDGAR V. SEELER

Committee on Biography and History—

CHARLES Z. KLAUDER (*Chairman*)
T. P. CHANDLER
ALLEN EVANS
WILLIAM D. HEWITT
GEORGE C. MASON
ARTHUR I. MEIGS

Committee on Preservation of Historic Monuments—

CHARLES A. ZIEGLER (*Chairman*)
ELLISTON P. BISSELL
LEICESTER HOLLAND
THOMAS M. KELLOGG
GEORGE C. MASON
HORACE WELLS SELLERS
EMLYN L. STEWARDSON

Committee on Competitions—

HORACE WELLS SELLERS (*Chairman*)
ARTHUR H. BROCKIE
FRANK MILES DAY
EDWIN H. FETTEROLF
GEORGE HOWE
MILTON B. MEDARY, JR.
JOHN HALL RANKIN

Committee on Public Information—

EDWARD A. CRANE (*Chairman*)
C. L. BORIE, JR.
GEORGE S. IDELL
ALBERT KELSEY
GEORGE I. LOVATT
JOHN P. B. SINKLER

STANDING COMMITTEES—Continued

Committee on Education and Program—

John P. B. Sinkler (*Chairman*)
Elliston P. Bissell
Edward A. Crane
Edmund C. Evans
Edmund B. Gilchrist
Arthur I. Meigs
H. Bartol Register
Emlyn L. Stewardson
Frank R. Watson

Delegates to the State Board—

Horace Wells Sellers, *Ex-Officio*
Edward A. Crane, *Ex-Officio*
Wm. L. Baily
John Molitor
Thomas Nolan
Wm. L. Plack
John Hall Rankin
Albert Kelsey
John T. Windrim
Milton B. Medary, Jr.

Chapter Jury—

George H. Bickley
Edward A. Crane
Paul P. Cret
Frank Miles Day
George Howe
Charles Z. Klauder
Robert R. McGoodwin
John Hall Rankin
Edgar V. Seeler
Horace Wells Sellers
John P. B. Sinkler
Clarence C. Zantzinger

Committee on Entertainment and Meetings—

Lawrence V. Boyd (*Chairman*)
John F. Harbeson
H. Bartol Register
John P. B. Sinkler

SPECIAL COMMITTEES FOR 1917

Committee on Allied Arts—

J. Dulles Allen (*Chairman*)
Frank Miles Day
Wilson Eyre, Jr.
H. Bartol Register
Frank R. Watson
John P. B. Sinkler

Committee on Civic Betterment—

Edwin H. Fetterolf (*Chairman*)
John I. Bright
Wm. L. Baily
Edmund C. Evans
Albert Kelsey
John Molitor

Committee on Institute Membership—

John Hall Rankin (*Chairman*)
Albert Kelsey
John P. B. Sinkler

MEMBERS

FELLOWS, AMERICAN INSTITUTE OF ARCHITECTS

Borie, C. L., Jr., 139 South 15th Street.
Boyd, David Knickerbacker, 139 South 15th Street.
Chandler, T. P., 1043 Real Estate Trust Building.
Crane, Edward A., 1012 Walnut Street.
Cret, Paul P., 516 Woodland Terrace.
Day, Frank Miles, 925 Chestnut Street.
Eyre, Wilson, Jr., 1003 Spruce Street.
Hewitt, William D., 671 Bullitt Building.
Huckel, Samuel, Jr., 1211 Walnut Street.
Kellogg, Thomas M., 1012 Walnut Street.
Kelsey, Albert, 1530 Chestnut Street.
Klauder, Charles Z., 925 Chestnut Street.
Laird, Warren P., University of Pennsylvania.
Mason, George C., 412 Perry Building.
Medary, Milton B., Jr., 139 South 15th Street.
Nolan, Thomas, 212 DeKalb Square.
Plack, William L., 1208 Chestnut Street.
Prichett, William C., 416 Walnut Street.
Rankin, John Hall, 1012 Walnut Street.
Seeler, Edgar V., 101 South Juniper Street.
Sellers, Horace Wells, 1301 Stephen Girard Building.
Stewardson, Emlyn L., 316 Walnut Street.
Windrim, James H., 1501 Commonwealth Building.
Zantzinger, Clarence C., 139 South 15th Street.

MEMBERS, AMERICAN INSTITUTE OF ARCHITECTS

Baily, William L., 421 Chestnut Street.
Balderston, Charles, 411 Walnut Street.
Bassett, George G., 421 Chestnut Street.
Bickley, George H., 618 Chestnut Street.
Bissell, Elliston P., 807 Bailey Building.
Blithe, Wesley L., 608 Chestnut Street.
Bright, John Irwin, 1701 Chestnut Street.
Boggs, Edward T., 136 South 4th Street.
Boyd, Lawrence Visscher, 1215 Harrison Building.
Brockie, Arthur H., 1713 Sansom Street.
Bunting, Morgan, 603 Chestnut Street.
Castor, Horace W., 1107 Stephen Girard Building.

MEMBERS, AMERICAN INSTITUTE OF ARCHITECTS—Continued

Coneys, John L., 1083 Drexel Building.
Duhring, Herman L., 709 Bailey Building.
Evans, Allen, Provident Building.
Evans, Edmund C., Witherspoon Building.
Gardner, Clarence, 925 Chestnut Street.
Gilchrist, Edmund Beaman, 1424 Walnut Street.
Granger, Alfred Hoyt, 671 Bullitt Building.
Harbeson, John Frederick, 132 West Walnut Lane, Germantown, Pa.
Harris, John McArthur, 1061 Drexel Building.
Harris, J. Russell, 130 South 15th Street.
Hastings, T. Mitchell, 1713 Sansom Street.

Barrett Specification Roofs

Guaranteed for 20 Years

We Standardized the Roofs— Now We Standardize the Guarantee!

A DOZEN years ago the introduction of The Barrett Specification standardized roofing practice throughout the country and gave to the old "tar-and-gravel roof" a definite character and reliability.

Local contractors, in the past, have been accustomed to guaranteeing roofs of this type, free of repairs for from five to ten years.

To good reliable roofers such guarantees were no burden because the roof they constructed would last much longer than the guaranteed period. The fly-by-night roofer, however, did a poor and cheap job, gave his guarantee recklessly—and was generally out of business when the roof leaked or trouble came.

As manufacturers of the materials used in Barrett Specification Roofs we, therefore, determined a short time ago to standardize these guarantees and *make them of real value to users of these roofs.*

We, therefore, arranged with the U. S. Fidelity & Guaranty Company to issue a 20-Year Guaranty Bond covering every Barrett Specification Roof of 50 squares and over *wherever our Inspection Service was available.*

Today this Guaranty and Inspection Service covers all towns of 25,000 population and over and most of the smaller places in the thickly populated parts of the United States and Canada.

This bond takes the place of short-term guarantees formerly issued by the local roofer and obviously is far better because:

—it is for 20 years (instead of the usual five or ten)

—it is backed by a $15,000,000 Corporation

—it has the further backing of a great Surety Company

—it provides for an *impartial expert inspection of the job.*

To secure the 20-Year Guaranty write your roofing specification as follows:

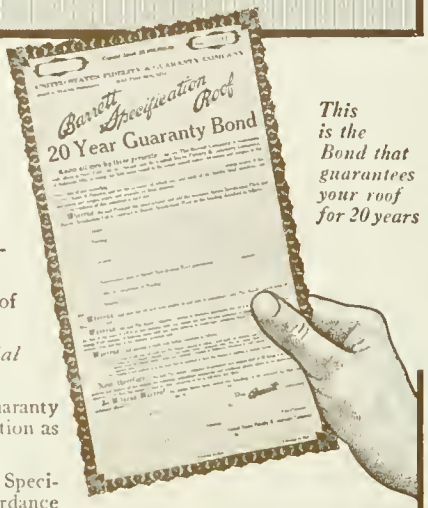
"The roof shall be a Barrett Specification Roof laid in accordance with The Barrett Specification, dated May 1, 1916, by a roofing contractor approved by The Barrett Company. The roofing contractor shall furnish The Barrett Company's Surety Bond Guaranty for twenty years, in accordance with Note 1 of said Specification."

On this solid and honest basis as many contractors as you desire may estimate on the job.

The winning contractor notifies us that he wishes the 20-Year Surety Bond and requests our Inspection Service.

One of our inspectors supervises the construction of the roof, tests it by cutting a cross-section, checks up the quantity and the quality of the materials used and certifies that The Barrett Specification has been strictly followed.

On the basis of the inspector's report the 20-Year Surety Bond is issued by the U. S. Fidelity & Guaranty Company, and the Bond exempts the owner from all expense for repairs or maintenance for the next 20 years.



This is the Bond that guarantees your roof for 20 years

The Guaranty Bond costs you nothing. The service is free *in the interest of good workmanship and the good repute of our materials.*

Barrett Specification Roofs are recognized today as the standard covering for permanent buildings of all kinds. The cost, per year of service, is less than any other roof covering. Approved as "Class A" construction and take the base rate of fire insurance.

If you are interested we shall be glad to send you further details on request.

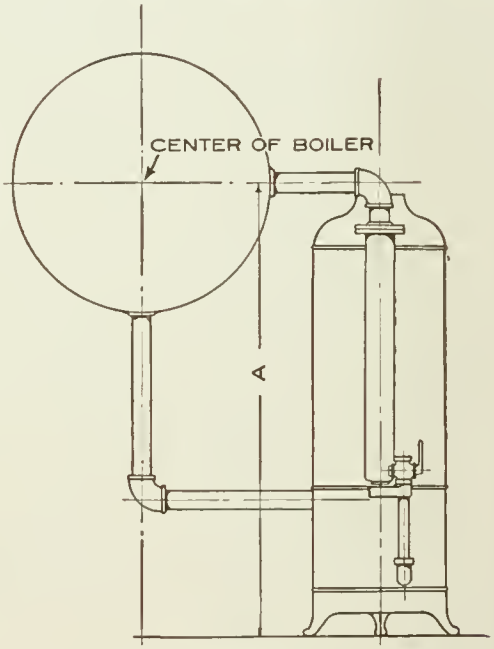
Heights of boiler supports are minimum.
Place boiler as close to ceiling as possible.



Roughing In Dimensions

These systems are intended for use where the demand for hot water at one outlet or simultaneously at several outlets exceeds the capacity of an Instantaneous Automatic Water Heater, or where water pressure or piping conditions are such as to preclude the use of an Instantaneous Automatic Water Heater.

A System consists of a Storage Boiler of sufficient capacity to supply the normal hourly demand, a Multi-Coil Storage Heater of proportionate capacity and a Moment Valve or Snap Acting Thermostat which controls the consumption of gas by the heater in accordance with the temperature of the water in the boiler. Accessories furnished with a complete system in addition to the boiler, heater and moment valve are: Covering material for boiler insulation against radiation losses. saddles and supports for boiler and thermometer.

Issued by

The United Gas Improvement Company

Architects' Service Division

This sheet is furnished for the files of architects and has been made to conform to the size recommended by the American Institute of Architects

A Service For Architects

On the page opposite is reproduced part of Sheet No. 12 of our Architects' Service.

This service was conceived with the idea of placing in the files of the architects of Philadelphia, for ready reference, information relative to gas appliances, house piping specifications and various kindred subjects.

The following sheets have been issued prior to January 1, 1917:

Sheet No. 1—Fireplace Heaters; Gas Fired

Sheet No. 2—Conceal-O Plate

Sheet No. 3—A Standard Schedule for Gas Piping

Sheet No. 4—Standard Cabinet Gas Range

Sheet No. 5—Short Cabinet Gas Range

Sheet No. 6—Box Cabinet Gas Range

Sheet No. 7—Large Cabinet Gas Range

Sheet No. 8—Elevated Oven and Apartment House Ranges

Sheet No. 9—Bathroom Wall Type Heater; Gas Fired

Sheet No. 10—Gas Water Heaters; Instantaneous Automatic Type

Sheet No. 11—Safety Garage Heater; Gas Fired

Sheet No. 12—Gas Water Heaters; Multi-Coil Storage System

These sheets are made to conform to the size recommended by the American Institute of Architects, and the data is presented in a concise and easily readable form.

Have you these sheets? If not, we shall be glad to send them and mail additional sheets as issued.

Our Architects' Service Division will be glad to confer with you at any time.

Efficiency Kitchen equipped with a "Standard" One-Piece Kitchen Sink

THE increasing demand for better Kitchens is well founded. The sanitary feature alone is reason enough. The first step in this direction is the installation of a sanitary Kitchen Sink. The "Standard" One-piece type of Kitchen Sink is accepted as the last word in sink construction, both from the standpoint of absolute sanitation and efficiency in service. White enameled, without dirt catching cracks or crevices, adjustable in height from 30 to 36 inches, improved faucets that prevent splashing, duplex strainers, and air chambers that prevent "pounding" are some of the distinctive features of "Standard" Sinks.

"The Aristocrat of the Kitchen"
"Standard" One-Piece Sink, P 6710

There is a variety of sizes. The largest one (length over all 78½ inches) can be easily placed in a small Kitchen, if the Kitchen is efficiently arranged as shown by the accompanying floor plan.

Our special bulletin on the subject of "Efficiency Kitchens", containing practical information for the Architect, can be obtained by writing to any "Standard" Showroom or from any of our traveling Representatives.

Reliable White Lead

MEANS SATISFACTORY PAINTING

Whether for exterior painting or interior decorating the efficiency and economy of pure lead and oil paint keeps it regularly specified by architects today as it was by their predecessors.

The sure way and the easy way to insure the use of simon-pure white lead and linseed oil is to insert the two little words "Dutch Boy" into all paint specifications for these materials.

To simplify the work of making up specifications for painting, we have compiled a booklet that contains the standard formulas for painting of every description. If your copy has been mislaid, we shall be glad to send a copy of our latest edition of "Painting Specifications."

National Lead Company

Cincinnati, Cleveland, St Louis, San Francisco

Subtile Color Harmony

IN PERMANENT TINTS

the first step in outside painting or interior decorating is the selection and development of a harmonious color scheme. To be permanently pleasing it is essential that the coloring matter in the paint shall be light-proof—fadeless.

Lewis Colors

are made from the highest grade of imported and domestic pigments and dyes. Their purity and careful manufacture give them great tinting strength and permanence of tone. Ground to impalpable fineness in pure Lewis Linseed Oil, of uniform tone and chemical composition, they represent years of manufacturing experience and perfecting. They are made in all standard colors.

Our new booklet "Lewis Colors" will be mailed on request

—more than just "sash"

We do not merely sell steel sash: we place a trained staff and years of experience at the service of our customers and their architects, to the end that every Lupton-equipped building shall be perfectly adapted, in daylighting and natural ventilation, to its special use.

For lofts and factories we offer sash designs which place the control of ventilation either in the responsible hands of the foreman on each floor, or in the hands of the individual workmen, as required by the work.

For sawtooth roofs on single or multi-story buildings we provide weather-proof continuous sash, with mechanism for simultaneous motor control of openings in the entire roof when desired.

For foundries, forge shops, engine and boiler rooms and chemical works we offer designs that are weather-proof, yet give abundant light and air over the entire area, regardless of how wide or long.

Our new Catalogue, No. 9, is replete with interesting data

Hajoca Plumbing Fixtures are designed primarily for the service of sweet and health-preserving cleanliness.

When sanitary excellence is attained in their design, then the mechanical and operating features are brought to perfection.

Accurate and painstaking care is taken that each thread, every connection, and the smallest piece of bronze brasswork, whether on bathroom or laundry fixture, shall measure up to the Hajoca standard of dependable quality.

Finally our fixtures are made to satisfy your clients' demand for beautiful as well as utilitarian qualities.

The combining of these three essentials—sanitary perfection, long-lived satisfactory service and distinctive appearance qualities, has made Hajoca plumbing the reliable choice of architects for sixty years.

Hajoca goods are right.

You and your clients will find our showrooms fully equipped with Hajoca Plumbing for every building requirement. You are cordially invited to make a close range study of the actual fixtures.

About the Greenhouses We Build

For over half a century, we have been building greenhouses. Logically, then, we ought to know how greenhouses should be built.

In that fifty and more years, we have built practically all kinds of glass enclosures, from garden cold frames at a few dollars each, to conservatories, glass-enclosed swimming pools, orchard houses and even orange grove glass-ins, costing up into the thousands.

It matters not whether you want just a small house, costing but a few hundred dollars, or one most pretentious; we can give you a service and a value that we think careful investigation will prove to you cannot be equalled.

We should be glad to talk with you.

Send for our Two G's Booklet, or Glass Gardens, A Peep into Their Delights.

OUR PHILADELPHIA SERVICE STATION, WITH FULL EQUIPMENT FOR REPAIRS SUBJECT TO CALL DAY OR NIGHT

WHEN Terra Cotta is used prominently to define and accentuate the characteristics of a design it should be Terra Cotta of the very best kind.

The Atlantic Terra Cotta on Mr. Kelsey's Haddington Branch Library is small in quantity but very important architecturally, and certainly of excellent quality.

Soft gray is used for the coping, cornice and entrance. The vestibule is worked out in Atlantic Polychrome, white and a little yellow for low relief modeling against a paneled background of blue.

Small but important work of this character has quite as much to do with our reputation as large contracts like the Woolworth Building of New York.

Our Motto

"DURABILITY FUEL ECONOMY EFFICIENCY"

The illustrations on this page are merely designed to suggest to you a few of the types of apparatus which we manufacture.

For sixty years we have been providing the public with the best types of Heating and Cooking Apparatus that we were capable of producing, and their appreciation has been demonstrated by the fact that over 300,000 Spear Appliances have been sold.

Spear Appliances are made in Philadelphia, and with every one sold there goes not only sixty years' experience, but service—ask about this service.

Write for booklets, and extend our Representative the privilege of assisting in the solution of your Heating, Cooking and Laundry Appliance problems.

This Device Eliminates Attention To Drafts and Dampers

Automatic heat regulation in the home is an absolute necessity during the cold and unsettled months. This device revolutionizes heating plant attention by taking complete charge of the drafts and dampers of any kind of heating plant burning coal or gas. Its accurate operation insures even, comfortable temperatures every minute of the day and night.

The "MINNEAPOLIS" HEAT REGULATOR

is entirely automatic at all times.

A simple adjustment of the clock attachment enables one to secure automatically and silently a change to lower temperature during the night hours, lessening fuel consumption while heat is least needed coming back to a warm comfortable degree at any morning hour you desire without any effort on your part.

Guarantees safe economical heat, and is a marvel of convenience. Has been the standard for 32 years.

Every architect should know the *"Minneapolis."* Our absolute guarantee of satisfaction endorses your recommendation.

Easily installed in any home old or new and sold by the heating trade everywhere

Our booklet shows all models Nos. 35, 40, 47, 55, 60 and 65, explains details and gives prices

SPECIFY **Liquid Granite**
FLOOR VARNISH

For your own satisfaction.

Most architects like the feeling of satisfaction after their work is finished and this can only happen to those who use the highest grade of Varnish— SPAR LUXEBERRY VARNISH

The work of a good floor varnish is two-fold. It should both protect and beautify the surface it covers. Liquid Granite has been doing this two-fold work in homes and public buildings for over half a century. Its lustre enhances the beauty of natural woods and its extraordinary toughness defies the effects of water, weather and hard wear.

The same qualities of toughness and elasticity that mark Liquid Granite also distinguish Luxeberry White Enamel. And whether you prefer a finish of porcelain-like brilliancy or dull ivory in tone Luxeberry produces a surface that shows no trace of brush marks and refuses to crack, chip or turn yellow no matter how hard the wear.

Walls finished with Old Virginia White
Roofs stained with Cabot's Creosote Stains

Cabot's Creosote Shingle Stains

The original and standard shingle stains. Soft, rich and transparent coloring effects, guaranteed wearing qualities, thorough preservation of the wood. The thoroughly reliable stain, proved by thirty-five years' use under all conditions.

Cabot's Old Virginia White

A soft, brilliant white for shingles and other rough wood — gives the whitewash effect, but doesn't rub, wash or streak. Old Virginia Tints give the pastel effect.

Cabot's Stucco Stains

For staining and rainproofing cement buildings. Rich colorings, without gloss or shine, and with no coating to chalk or peel.

Cabot's Waterproof Brick Stains

Made in various colors, for faded, off-colored or uneven brick.

Cabot's Sheating and Deafening "Quilt"

Warmer, more permanent, and cheaper than back-plaster. The most scientific, sanitary, and perfect heat insulator and sound-deadener ever made.

Conservo Wood Preservative

For preserving posts, sills, planks and all similar woodwork.

Cabot's Dampproofing

An adhesive damp course for direct plastering and for stone-backing.

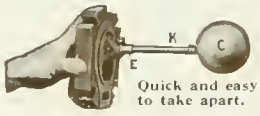
THE McDANIEL IMPROVED STEAM TRAP

¶ Discharges Continuously and Never Blows Steam. Made Extra Heavy for High Pressure. No pipe connections are broken when making repairs, all steam pipes being attached to the body. Steam can't blow through. Always maintains water seal over discharge valve. They have large discharge valves and cannot be flooded with sudden flushes of water. ¶ We also manufacture Reducing Valves, Pump Governors, Relief Valves, Exhaust Pipe Heads, Ejectors and Steam Separators.

All working parts are here



Quick and easy to take apart.
